

SLX-3 Semi-Automatic Horizontal Sleever

The SL-X3 series machine automatically erects sleeves by means of a rotary-motion vacuum pick-off from a magazine on demand by the operator, then places them into continuously moving flighted chains.

The sleeve base is pushed down and fixed to prevent bowing on the non-load side, ready for the operator to insert the product.

After loading, the anti-bowing pusher is retracted and the sleeve is ejected from the machine.

- Designed for a three-shift operation
- Heavy welded stainless steel frame
- Stainless steel guards
- Stainless steel shafts and guides
- Completely guarded by easily removable fixed guards and hinged see-through electrically interlocked top guards, allowing a clear view of the machine operation.
- Complies with BS5304
- Robust transmission chains with high quality carton lugs.
- Overload protection on machine drive and all mechanisms.
- Integral product conveyor
- Extensive use of heavy duty timing belts with duplex main drive chain
- All adjusting points fitted with hand wheels, digital readouts, quick release handles and calibrated scales.
- Operator interface fitted for machine control and fault indication.
- Low-level noise-below 80db (A)
- No air required

OPTIONAL EXTRAS

- Ink coding
- Stainless steel guards
- Automatic carton magazine loader
- 3 or 4-arm rotary head
- Barcode scanning
- Laser coding
- Through conveyor
- Part-load detection/rejection

SLEEVE SIZE RANGE

- A - 108 – 300mm
- B - 44 – 250mm
- C - 20 – 100mm

Top Overhang - Max 25mm

Max height variation 75mm

Specials: on request

TECHNICAL DATA

Output
Variable up to 100 Sleeves/min
Subject to application

Carton Flight Pitch
Std. Options, 7.5", 10", 15"
pitch between flights
