

TFX-I Vertical Fully Automatic Tray Erector

The TFX-1 series machine automatically picks flat blanks via a vacuum pick off head from a magazine on demand by the operator, and places them into a punch table.

The table is pushed forward where glue is applied where required ready for the blank to be punched into shape.

The blank is punched into shape through a forming blank and held into place with tabs or glue.

The box is ejected from the machine through a ramp or conveyor system.

- Designed for a three shift operation
- Heavy welded st/steel frame
- Stainless steel shafts and guides
- Completely guarded by easily removable fixed guards and hinged see-through electrically interlocked top guards allowing a clear view of the machine operation
- Complies with BS5304
- Robust transmission chains
- Overload protection on machine drive and all mechanisms.
- User interface touch panel
- Quick change carton blanks
- Low level noise-below 80db (A)

OPTIONAL EXTRAS

- Ink Coding
- Stainless Steel guards
- Automatic carton magazine loader
- Multiple heads
- Barcode scanning
- Laser coding
- Through conveyor
- Cold Gluing
- Tuck
- Hot Gluing

BOX SIZE RANGE

- A - 100mm – 250mm
- B - 100mm – 250mm
- C - 20mm – 100mm

Specials can be made to request

TECHNICAL DATA

Output :-
Variable up to 40 Blanks/min

3N~50 Hz 400/230V 0.75 KW AC Motor giving variable speed
24V control circuit 3KW single phase for hot melt applicator
